

Never share a code.

If a code arrives by text and someone asks you to read it out, that person is a scammer.

THIS IS TRUE EVEN WHEN

- 01 They say they are from your bank
- 02 They say they are the police
- 03 They know your name and address
- 04 They say your money is in danger

Hang up. Then call the company back on the number on your card, your statement, or their app.
